Special Integration Bulletin

April 14th 2005

PTI went Live

Dear colleagues,

It is with certain pride that I am able to announce that Siemens PTI went Live today, April 14th 2005, on the new SAP system.

Thanks to the great efforts of the Conductor team from Raleigh and the PTI team members we managed to set up the system, clean up & migrate master data as well as open items and three months of financial history in only three and a half months.

Our "Thank You" extends to all the SPT&D and Siemens US employees, who helped PTI to get through the first quarter without a system while integration was running next to the 'normal' business operations.

Thank You *K. Schmidt*
